Be prepared for enhanced medicines optimisation roles. Apply now for a fully funded place in Bath or London, to study towards a Postgraduate Certificate award.

Community pharmacy is changing, with closer integration into the wider NHS healthcare team. Develop effective clinical decision-making, communication and consultation skills with **fully-funded training courses** supported by NHS England and Health Education England through the Pharmacy Integration Fund.

Courses are online and interactive, some have a face to face workshop. Choose from clinical and therapeutic areas:

- + Professional Skills for Medicines Optimisation
- + Evidence Based Pharmacy Practice
- + Managing Long Term Conditions 1, 2 and 3
- + Managing Polypharmacy and Multimorbidity
- + Minor Ailments
- + Public Health
- + Providing Better Care for the Older Person
- + Quality Improvement

- Study at your own pace – with **funding up to a Postgraduate Certificate** award
- Tailored learning to enhance your role and professional interests
- Increased confidence to develop and extend your clinical and professional role
- Prioritise and risk assess patients with multiple long term conditions
- Flexible work-based learning with online learning, quizzes, podcasts and face-to-face workshops
- Excellent individual support and learning networks
- Minimal time away from work
- Workshops in Bath or London
- Help meet your GPhC CPD requirements and professional development in line with the RPS frameworks

You can take a single online course (which can count toward CPD) or combine course modules and gain a Postgraduate Certificate.

Places are limited and funding will close in March 2019.
