

6th December 2018

Ref PH506

To all Community Pharmacies in the Wessex area

Dear Colleague

Please see below information on The Independent Medicines and Medical Devices Safety (IMMDS) Review.

The Independent Medicines and Medical Devices Safety (IMMDS) Review

The [IMMDS Review](#) is investigating three medical interventions where patients have reported problems and suffered serious harm.

The Review wishes to ensure that any individual or family affected by these three interventions is aware of its work and has the opportunity to make contact or provide evidence. It is therefore asking GP practices and community pharmacies to display the poster prominently for members of the public to see. The poster is available in two forms – a [print-sized](#) version and an [e-version](#)

Posters were sent out to community pharmacies registered as member of the Medication Safety Officer Network and to all the multiple high street pharmacies in September.

For further information, please contact the IMMDS Review communications team at reviewcomms@luther.co.uk or on [0207 618 9189](tel:02076189189)

Kind regards
Karen
