

COVID-19 Lateral Flow Tests

Important information for people collecting test kits

- 1) The tests help identify people who are positive for COVID-19 but do not have symptoms.
- 2) A negative result does not guarantee someone doesn't have COVID-19.

It is important to continue following Government guidelines and restrictions.

- 3) Instructions on how to use the test and report your results are inside the box.
- 4) It is important to report your results, whether positive or negative.

This helps the NHS identify areas where asymptomatic cases of COVID-19 are rising and declining so we can all keep each other safe.

When you report your result, you will be provided with information on the next steps you need to take.

- 5) Make a note of the lot number of the test kit used, in case you need to report any incidents related to the device, test instructions, harm or injury.

Details on how you can report any incidents can be found in the instructions within the box.
