

NHS Flu Season 2021/22

Flu planning for 21/22 flu season

NHS England & NHS Improvement have now confirmed training requirements for the 21/22 season

Previously trained (Face to Face)

Every 3 years pharmacists are required to update their knowledge and attend refresher training in injection technique and basic life support skills. This requirement was removed last year, but has been re-instated this year.

i.e. If your Face to Face training was in 2018 (or older) you will need to attend refresher training.

There are many companies providing face to face training -some have already published dates of courses. View training providers [here](#)

New to vaccinating

Those new to vaccinating this year will need to complete a face to face immunisations training course.

Trained face to face within the last 3 years

Annual self directed update training will be available from e-LfH.

NPA have 2021 courses available for both new and refresher

<https://www.npa.co.uk/flu-training-and-pgds/>

NPA courses available at Bournemouth 26/6, Southampton 11/7 & Reading South 8/8 & 22/8
