

# Provision of Flu Vaccine to Community Pharmacy

We at Viatris have been made aware that you require vaccines for the 18-64 cohort of patients for this season, and I am happy to say we can accommodate your request.

Our product is called **Influvac Tetra QIVe** which is an egg-based Quadrivalent licensed for all patients aged 6 months and above, but is recommended for the 18-64 cohort. **This vaccine is priced at £7.46 after a 25% discount.**

*The supplementary terms are:*

- 120 days for payment – meaning invoices won't need to be settled until the 31st January 2022.
- No cancellation policy.
- Multiple deliveries at no additional cost – should you require it.

Due to where we are in the season, I am afraid to say that there is no sale or return attached to the orders taken now, and the vaccines would come in single dose form as we have sold out of our trays of 10s. Providing the request is for 50 vaccines or more, we can accommodate as many as you need.

Should you wish to order, all you need to do is contact the flu team on **0800 358 7468**, or via **[flu@viatris.com](mailto:flu@viatris.com)** (marking the email for the attention of Martin Drain) and I will put the request through our system.

Deliveries will be made within a week, if you already have an account with us then the delivery can be quicker.
